SUMMARY

Passionate **Frontend Developer & UI/UX Designer** with experience building **responsive, user-friendly, and visually appealing web applications**. Skilled in **HTML, CSS, JavaScript, and React**, with a strong eye for design and usability. I bridge the gap between **design and development** by transforming wireframes and UI/UX concepts into clean, functional, and interactive interfaces.I thrive in collaborative environments, enjoy solving problems with code and design, and continuously explore new technologies to stay ahead of industry trends. I am seeking opportunities to **contribute to innovative projects, enhance user experiences, and grow as part of a forward-thinking team**.

SKILLS

Frontend Development: HTML5, CSS3, JavaScript (ES6+), React.js.

Backend Development: Node.js, Express.js, MongoDB

UI/UX Design: Wireframing, Prototyping, User Research, Figma.

Responsive Design & Accessibility

Version Control: Git & GitHub.

Tools: VS Code, Chrome DevTools, Figma

KEY ACHIEVEMENTS

Responsive Design Implementation
Implemented responsive design, enhancing user experience and increasing mobile traffic by 50%.

Project Team Success
Collaborated on a team project leading to a 25% increase in user engagement.

UI/UX Enhancement
Revamped design flows to improve usability and accessibility, resulting in higher customer satisfaction scores.

EXPERIENCE

Iambrand-Worthy ltd
Frontend & Backend Developer

Lagos, Nigeria
present

- Designed and developed the **company website** from scratch, ensuring responsive layouts and seamless user experience across devices.
- Built a **resume template editor** that allowed users to **create, edit, and either download their resume or send it directly via email**.
- Integrated a **Job Listing API** to enable users to search and view job opportunities directly on the platform.
- Developed backend functionality for handling **resume delivery via email, file downloads, and API integration**, ensuring smooth interaction between client and server.
- Optimized application performance, security, and scalability while maintaining clean, reusable code.

PROJECT

Iambrand-Worthy ltd
Frontend & Backend Developer

- Designed and developed the **company website** from scratch using **React** for the frontend, ensuring responsive layouts and a seamless user experience across devices.
- Built a **resume template editor** that allowed users to create, edit, and either download their resume or send it directly via email.
- Integrated a **Job Listing API** to enable users to search and view job opportunities directly on the platform.
- Developed backend functionality with **Node.js, Express, and MongoDB** to handle resume delivery via email, file downloads, and API integration, ensuring smooth interaction between client and server.
- Optimized application performance, security, and scalability while maintaining clean, reusable code.

PROJECT

Reborn Necessary Clothing
Frontend & Backend Developer | UI/UX Designer
- Designed and developed a **full-stack e-commerce platform** for purchasing male and female clothing.
- Implemented **shopping cart and checkout functionality**, enabling users to add items, manage orders, and complete secure purchases.
- Built an **admin dashboard** for product management (uploading, editing, and deleting items) and tracking customer orders.
- Ensured a **responsive and user-friendly UI/UX** across devices, improving customer experience and engagement.
- Integrated both frontend and backend systems to deliver smooth functionality and scalability.

Amazing Health Care Clinic
Frontend & Backend Developer | UI/UX Designer
- Designed and developed a **responsive hospital website** to provide healthcare service information and improve patient engagement.
- Integrated an **appointment booking form** allowing users to schedule consultations online.
- Built backend functionality with **Node.js, Express, and Nodemailer** to send appointment requests directly to the admin's email.
- Implemented a **clean and user-friendly UI/UX** using **React**, ensuring accessibility across all devices.
- Delivered a smooth connection between the frontend and backend, ensuring secure and reliable message delivery.
